SOFTWARE INTRODUCTION

OVERALL & WORKING AREA SIZE

Auto typesetti

HIKVISION

MTC06-3232GR SERIES

AUTOMATIC TOOL DEPTH RECOGNITION

A set of precision instrument sensing system is also designed under the adsorption platform. When the tool tip reaches the sensing area, the machine will receive a signal to obtain the depth of the tool tip.

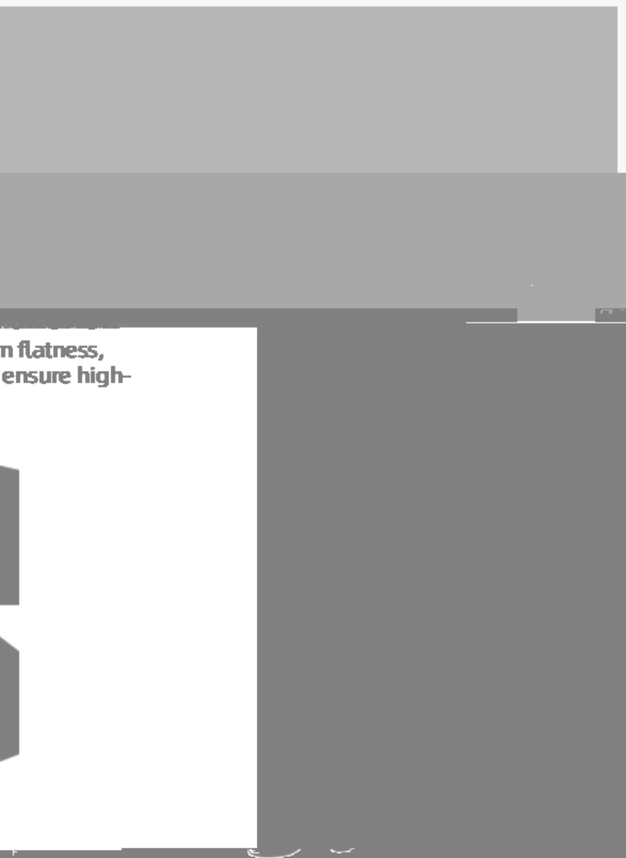

SAFETY ANTI-COLLISION SYSTEM

Equipped with a safety device based on infrared sensors to ensure the safety of operators while the machine is running at high speeds.

AUTOMATIC FEEDING SYSTEM*

According to actual needs, it can be equipped with two automatic feeding systems,coil and plate, to achieve

n flatness,
ensure high-

INTELLIGENT PARTITION SUCTION STRUCTURE FLATNESS ADAPTIVE TOOL DEPTH FUNCTION

Only turn on the suction function in the working area, save energy consumption, and achieve the maximum suction effect with the least amount of electricity.

Adaptive knife depth according to platform software corrects the plane in real time to quality cutting results.
